SUBMERSION

APPLICATION:

- Suitable for general purpose use in industrial and commercial indoor and outdoor environments in electrical push button and indicator light applications as an operator interface, housing for emergency-stop (E-stop) devices, and in compact portable control systems.
- Molded in a high-visibility yellow for use as a housing for start/stop buttons or an emergency stop button.

BENEFITS:

- High visibility yellow background ensures compliance with ISO standards and increases user safety especially in areas with low levels of lighting.
- Molded-in colors increase durability and eliminate damage to color from chipping or scraping and prevent need for frequent replacement.
- Captive polymer cover screws, lift-off cover and memory retaining seamless polyurethane gasket offers superior environmental protection and corrosion resistance.

INNOVATIONS & FEATURES:

- High-visibility yellow background for actuators
- Molded in color will not chip or scrape away
- 4 captive polymer cover screws, lift off cover
- Memory retaining seamless polyurethane gasket
- Mounting wells located under the cover/outside the gasket area
- Shipped with removable clear mylar protective film affixed to yellow cover for added protection prior to installation
- Four configurations: 1 hole 22mm diameter, 1 hole 30mm diameter, 2 holes 22mm diameter, 2 holes 30mm diameter
- Polycarbonate material construction with molded-in yellow color cover and black color base
- Soft edge design with minimal protrusions or exposed pocket areas to reduce collection of dust and debris
- Custom hole configurations and modifications are available upon request through our value-add Modright program. Please consult factory
