

Sir Robby's Coloring & Activity Quest

Presented by

ROBROY[®]

Match the Brands to Their Mission

Sir Robby is a knight who serves the mighty Kingdom of Robroy! Within this kingdom are many noble houses, each with their own banner and important mission. To begin his quest, help Sir Robby match each house banner to the mission they represent.

Did You Know?

Robroy is home to trusted brands that protect, connect, and simplify electrical installations – saving contractors time while keeping systems safe and strong.

1 Covers strong metal pipes with a tough PVC coating that **bonds** to the surface, protecting it from rust, scratches, and harsh environments.

2 Makes super strong polycarbonate **boxes** that keep important equipment safe from water, dust, and even rough weather!

3 Makes special **racks** that can be put together in lots of different ways, like building blocks. They're designed to stay super clean, which makes them perfect for places where cleanliness really matters!

4 Makes special pieces that help connect pipes together, like elbows, couplings, and the original **Korns Clamps**. They make sure everything fits just right, so electricity can travel safely where it needs to go.

5 Makes tough enclosures (protective boxes) that come in lots of shapes and sizes. They can be used almost anywhere—inside, outside, in factories, or even near water!

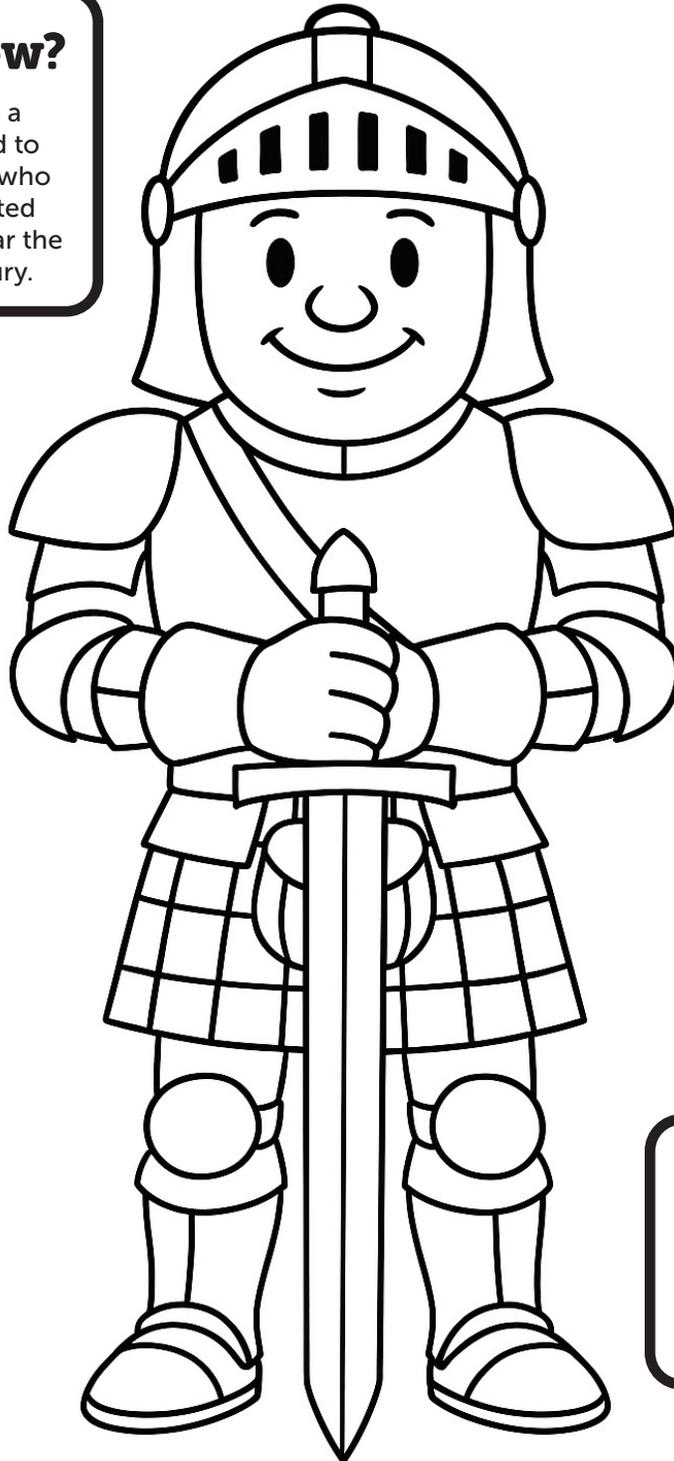

6 Makes shiny, **stainless steel** pipes and parts that fight off rust and keep germs away. They're used in places where being clean and safe is extra important—like in food factories!

Every Knight Needs Shining Armor

Help Sir Robby look his best by coloring him in for his next adventure!

Did You Know?

Sir Robby is based on a Scottish knight – a nod to the founder of Robroy, who immigrated to the United States from Scotland near the start of the 20th century.

Did You Know?

Robroy was founded in 1905 in Pennsylvania. That means it's more than 120 years old!

Every Quest has Hidden Secrets!

Help Sir Robby search the kingdom for important words that will guide him on his adventure.

Beware the Corrosion Dragon!

Inside the kingdom's great food halls...

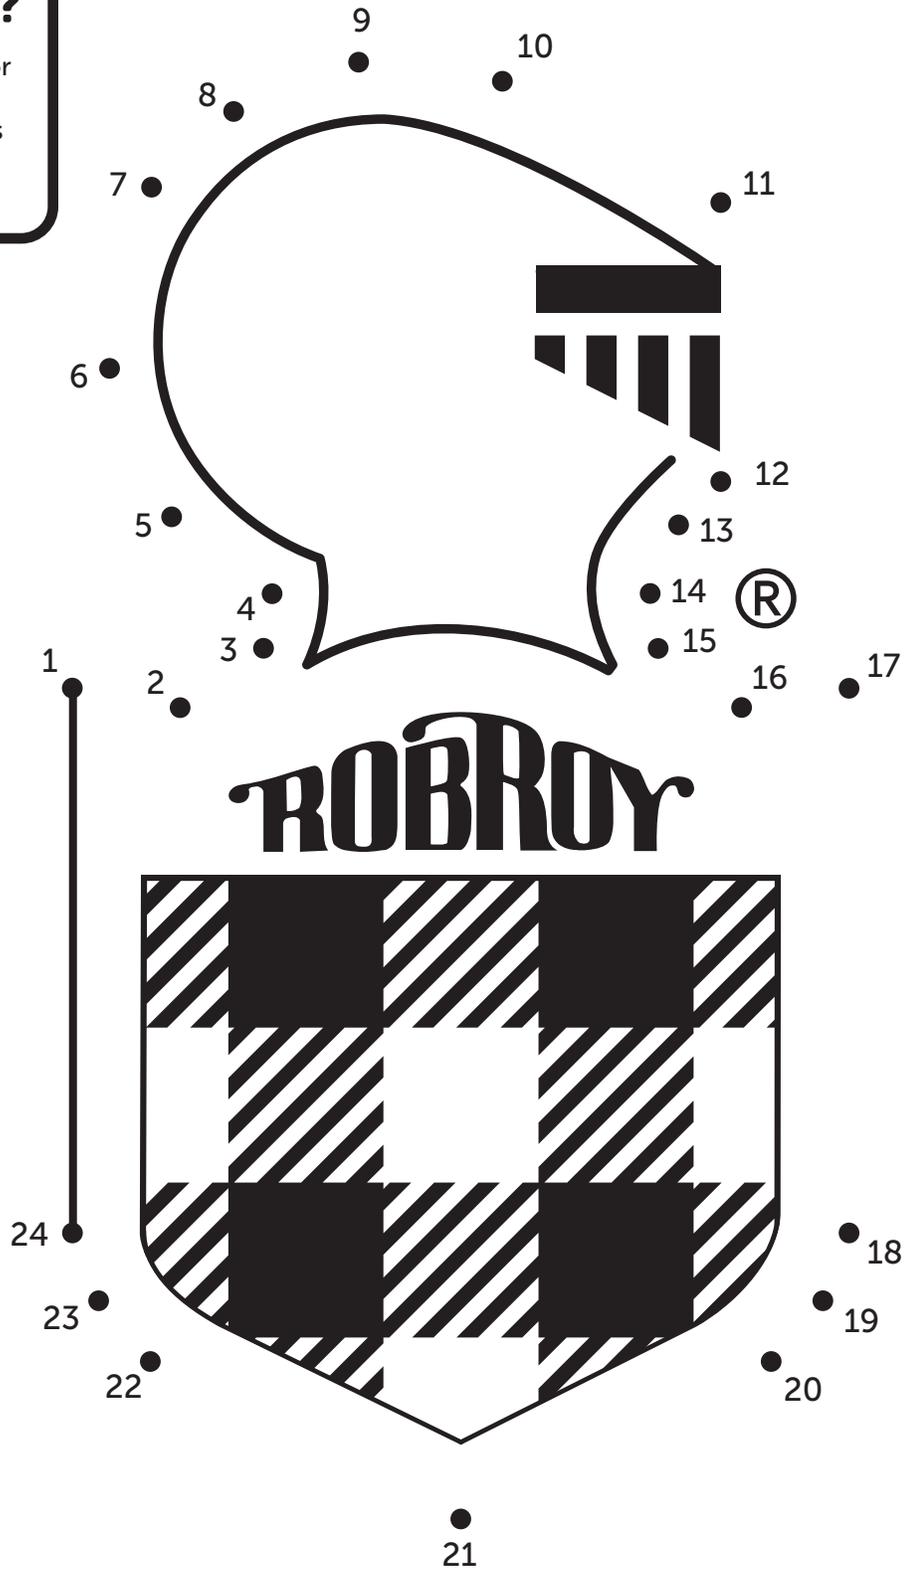

everything must stay clean and strong. Robroy Stainless protects the castle's food supply with hygienic electrical systems that shine like steel armor!

Every Knight Needs a Shield!

Connect the dots to reveal Sir Robby's symbol of protection!

Did You Know?

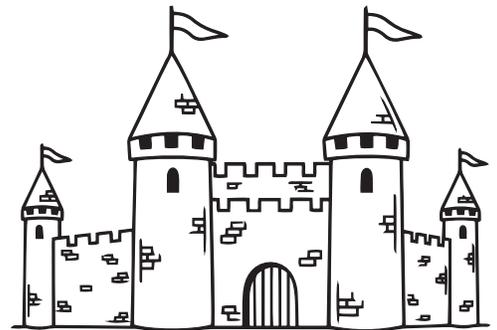

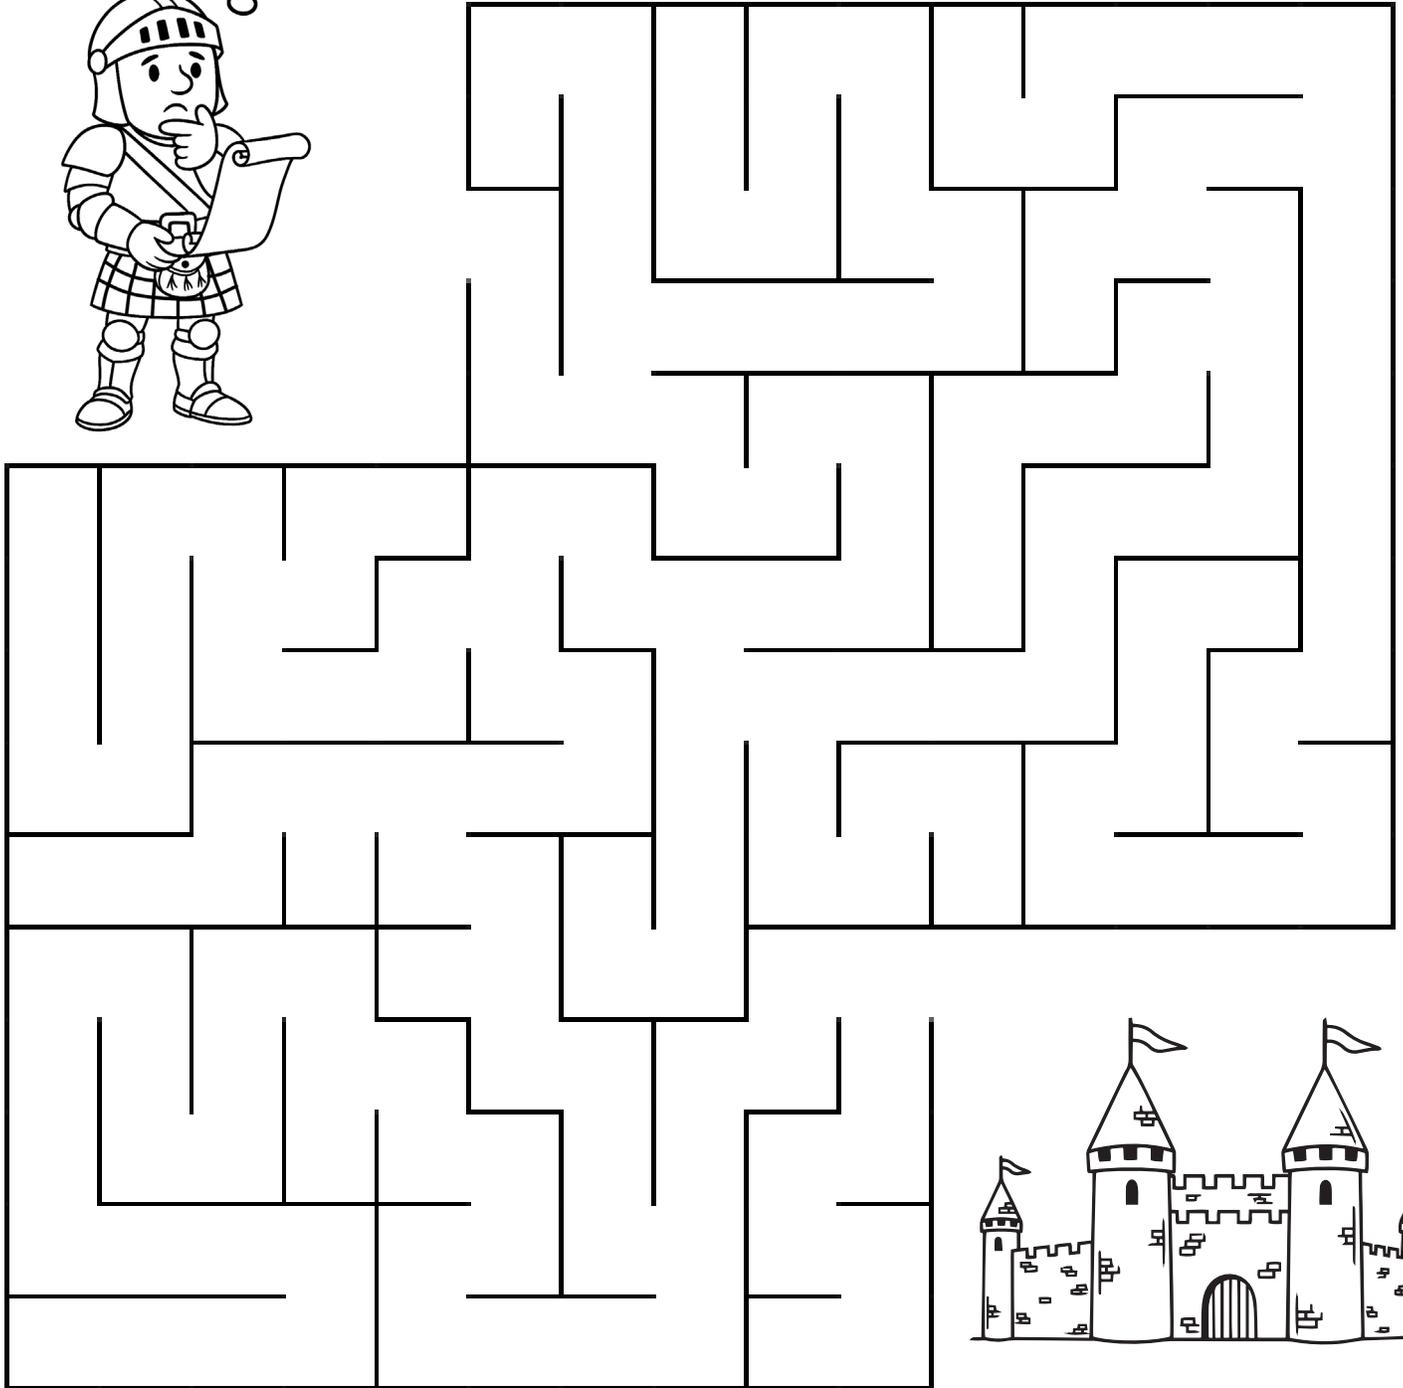

The Robroy shield stands for protection and reliability – guarding electrical systems against even the toughest challenges.

Sir Robby's Great Delivery Quest

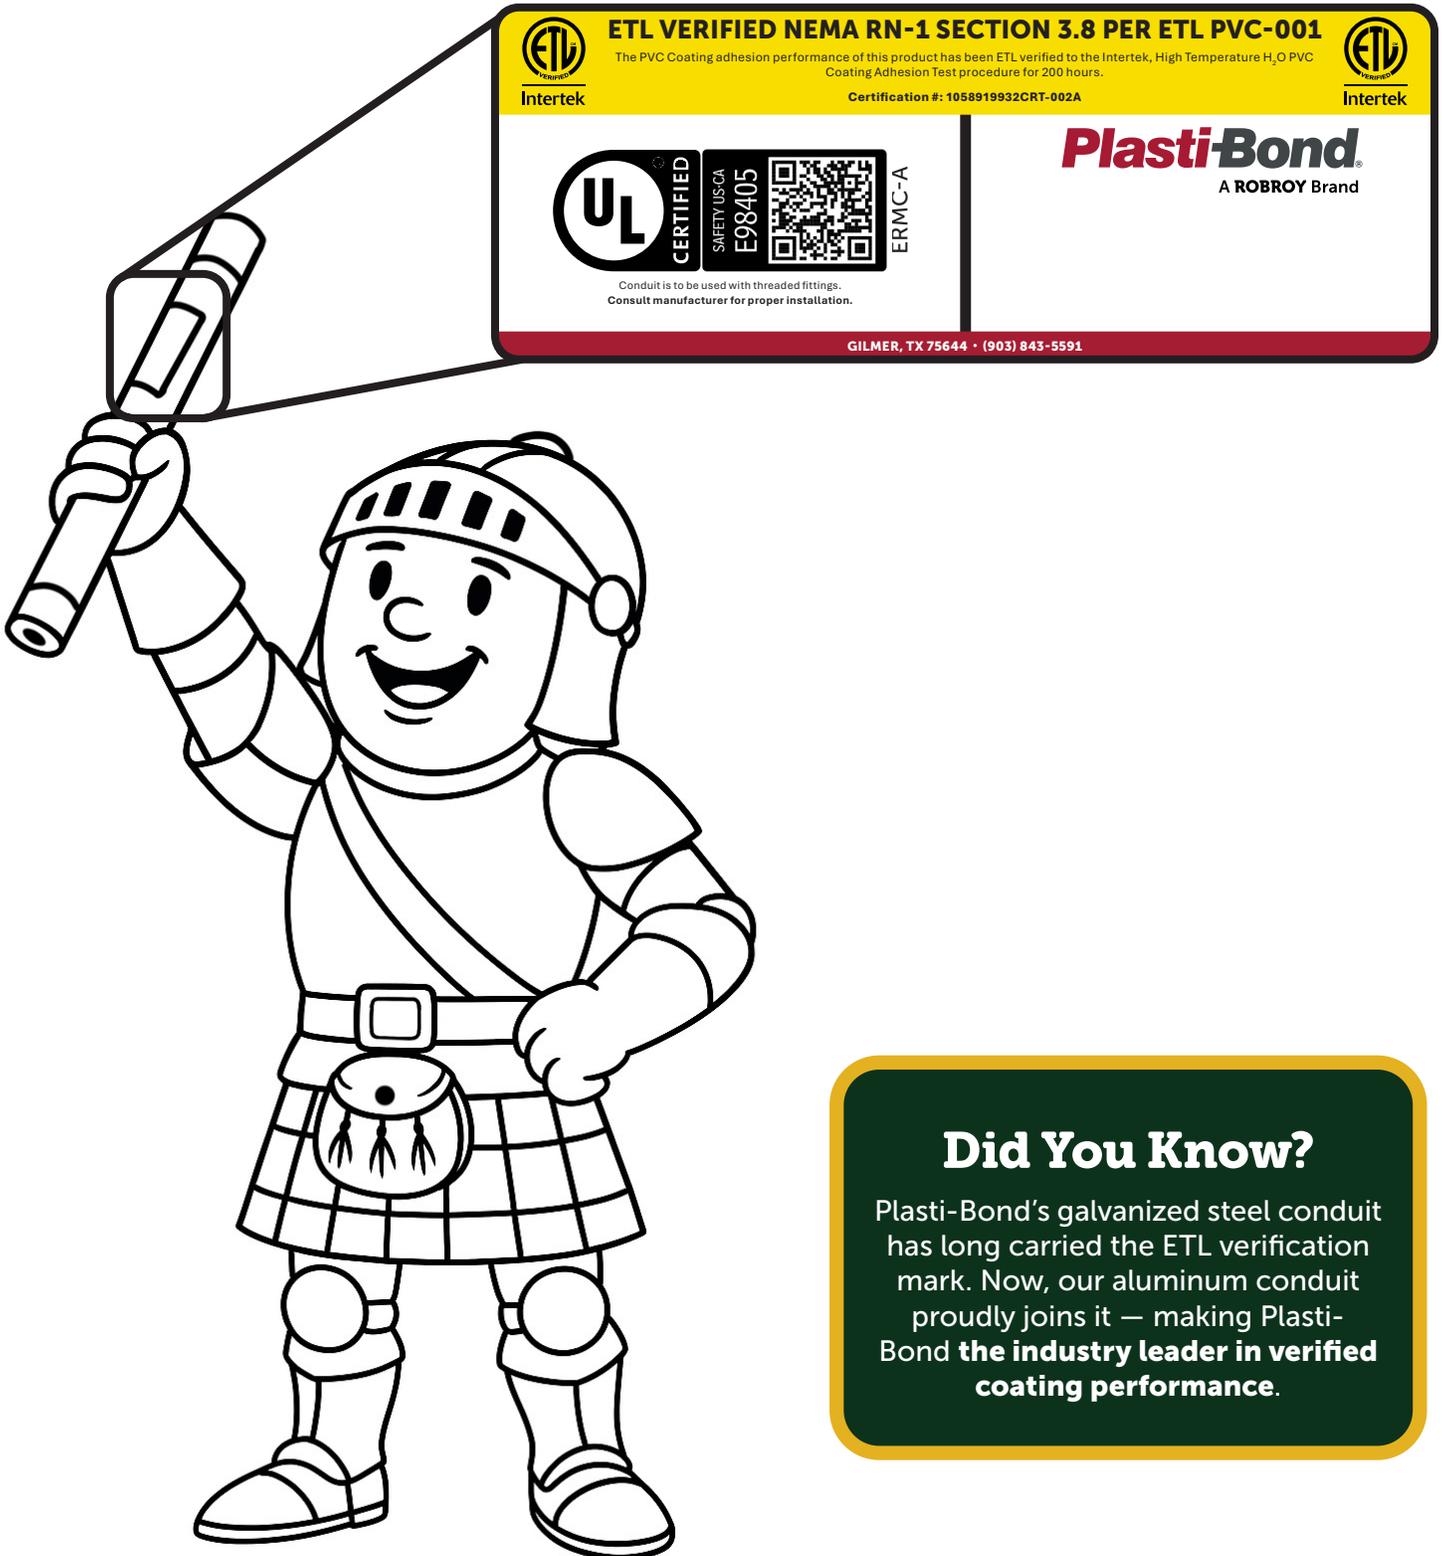

Sir Robby has prepared an important Submittal Scroll for the kingdom. Help him find the fastest path through the maze to deliver it safely!

Did You Know?
Robroy's **Quick Submittal tools** make it fast and simple to prepare submittal packages – so contractors spend less time on paperwork and more time building!

A New Seal of Honor!

Sir Robby has earned a new Seal of Honor! This ETL label shows that Plasti-Bond's aluminum conduit is tested, trusted, and proven strong.

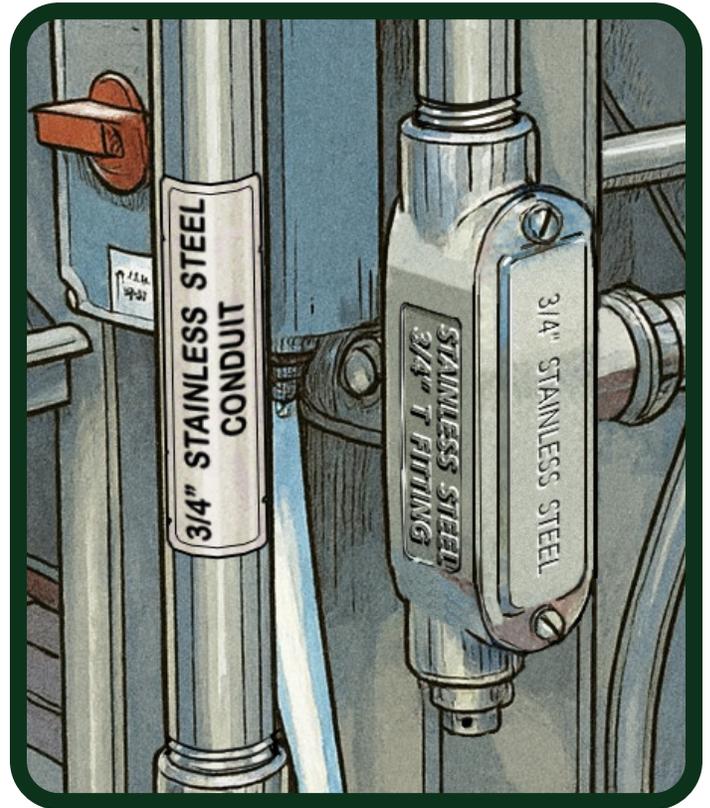

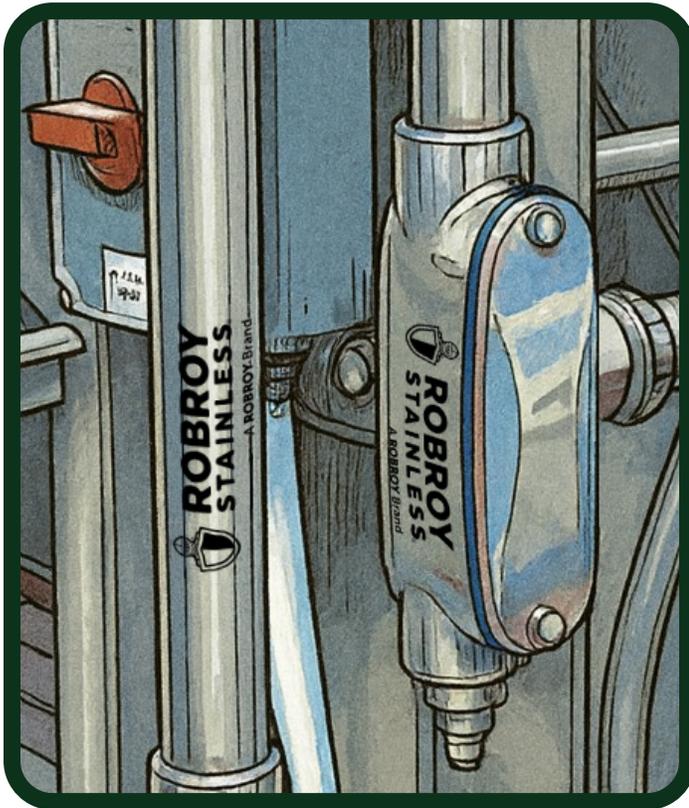

Did You Know?

Plasti-Bond's galvanized steel conduit has long carried the ETL verification mark. Now, our aluminum conduit proudly joins it — making Plasti-Bond **the industry leader in verified coating performance.**

Spot the Difference!

Sir Robby is inspecting the kingdom's food hall! One picture shows a safe stainless system installation, but the other shows a system that could let dirt or germs sneak in. Can you spot the differences to help Sir Robby keep the feast clean?

HINT: Watch out for troublemakers! Look for flat spots, cracks, or crevices where germs or water could hide, rough textures, paper labels, or threads sticking out. These small details make facilities less sanitary, safe, and compliant.

**How many differences
did you find?**

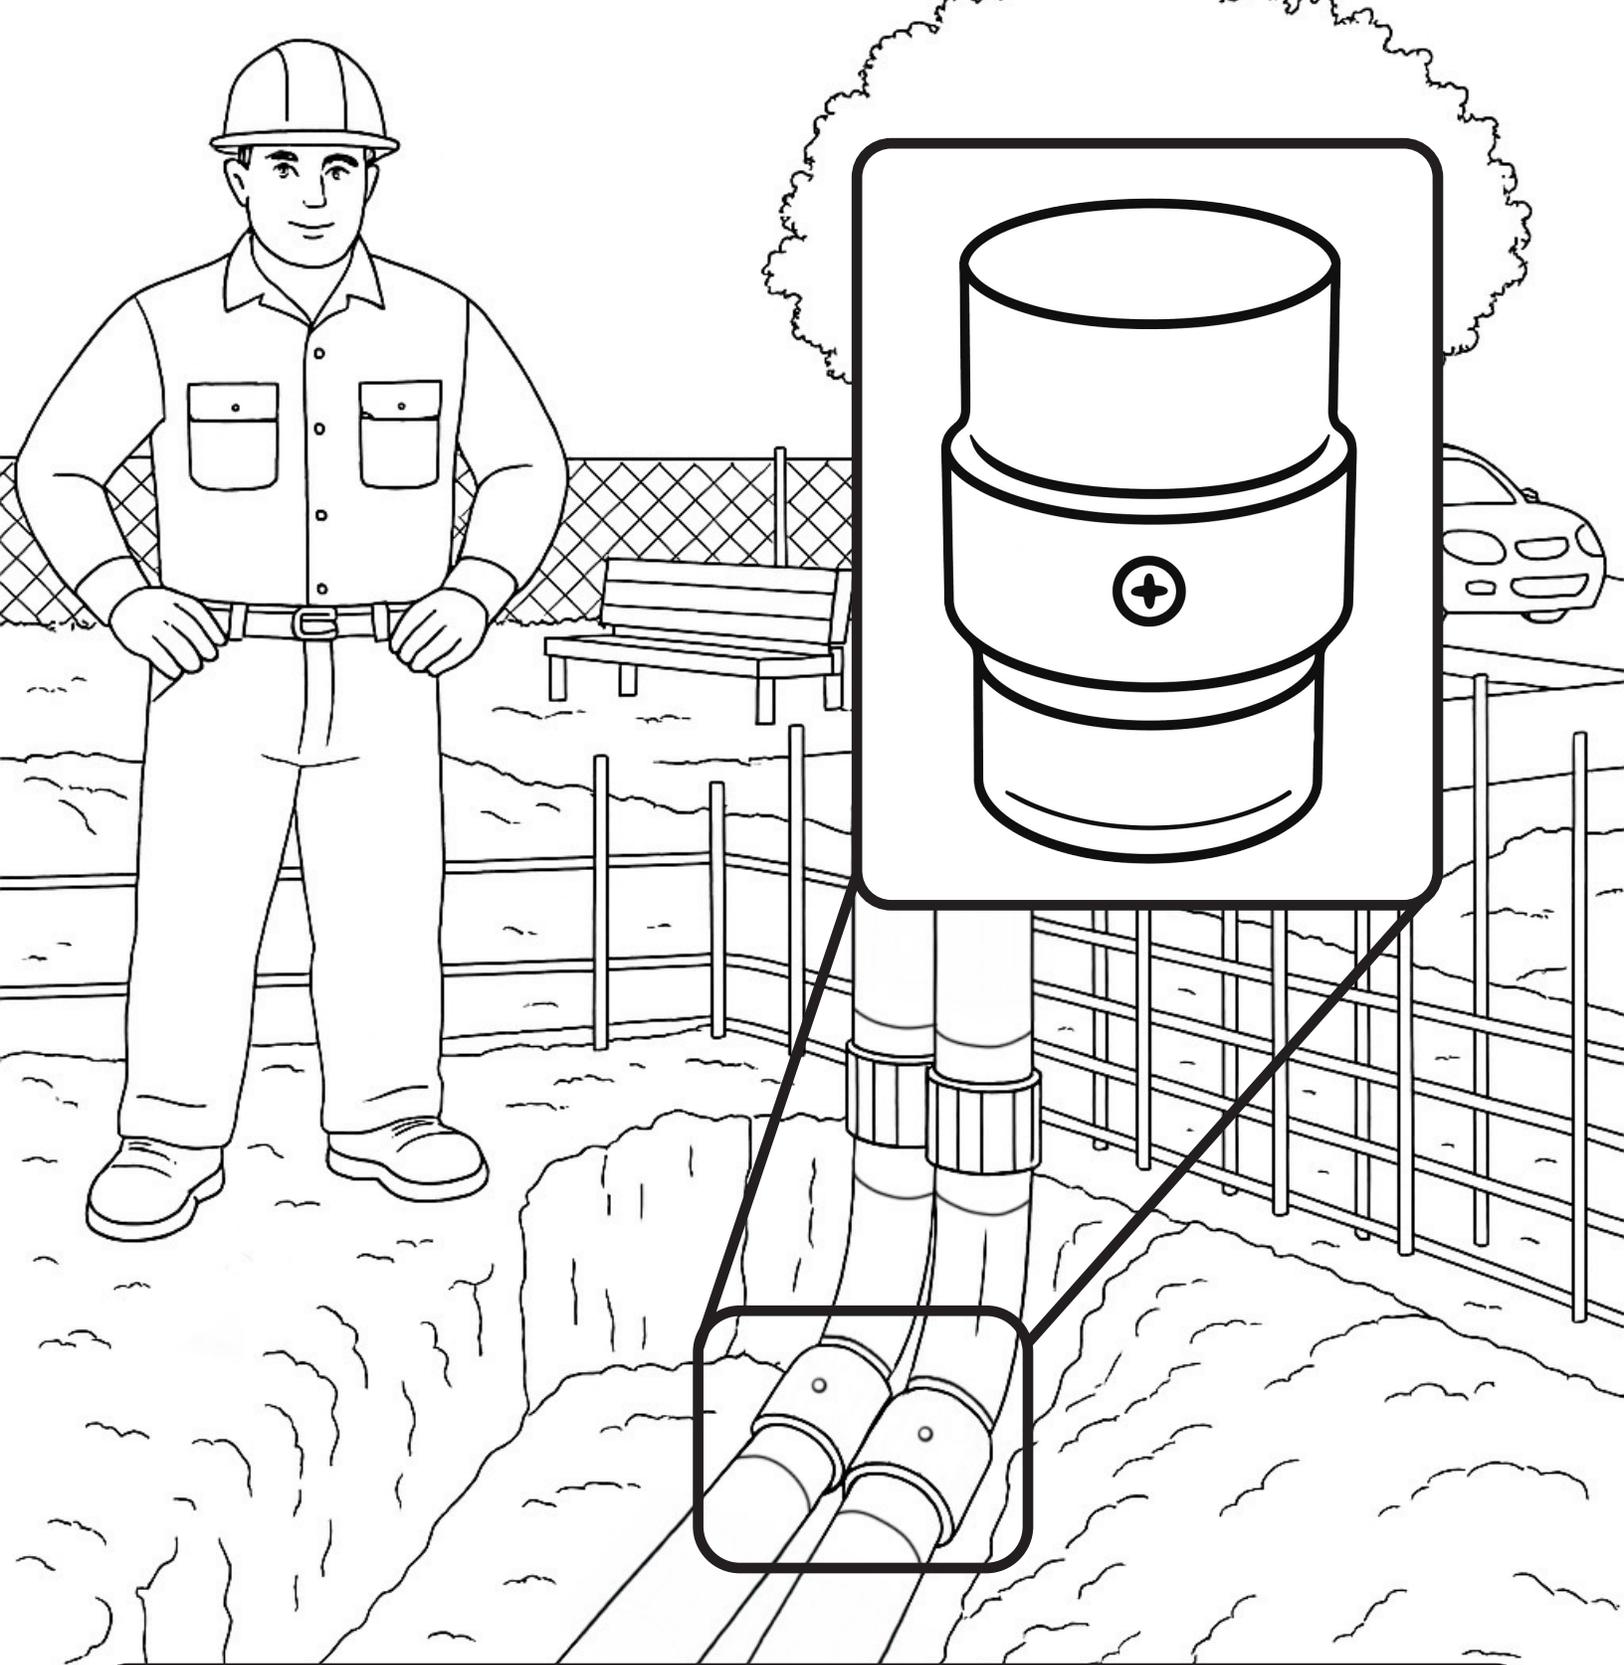

Circle the Safe Choice!

Only the safest treasures belong in the kingdom! Circle the fittings that have earned the UL 1203 mark of protection (you'll know them by their bright red tag).

Here's a Hint!

UL 1203 fittings are certified explosionproof and dust-ignitionproof by UL. That means they've been tested to be safe for really tough jobs, like places where gases or dust can be dangerous. To know if a fitting is UL 1203 listed, **look for the special red tag** attached to it – that tag is proof that the fitting passed the test!

Beneath the kingdom's surface...

Plasti-Bond's PVC-coated **SpeedCouple™** makes it quick and easy to join PVC-coated rigid conduit and elbows – without the need to turn them. Rated for direct burial and perfect for tight spaces, the SpeedCouple saves time while ensuring lasting protection.

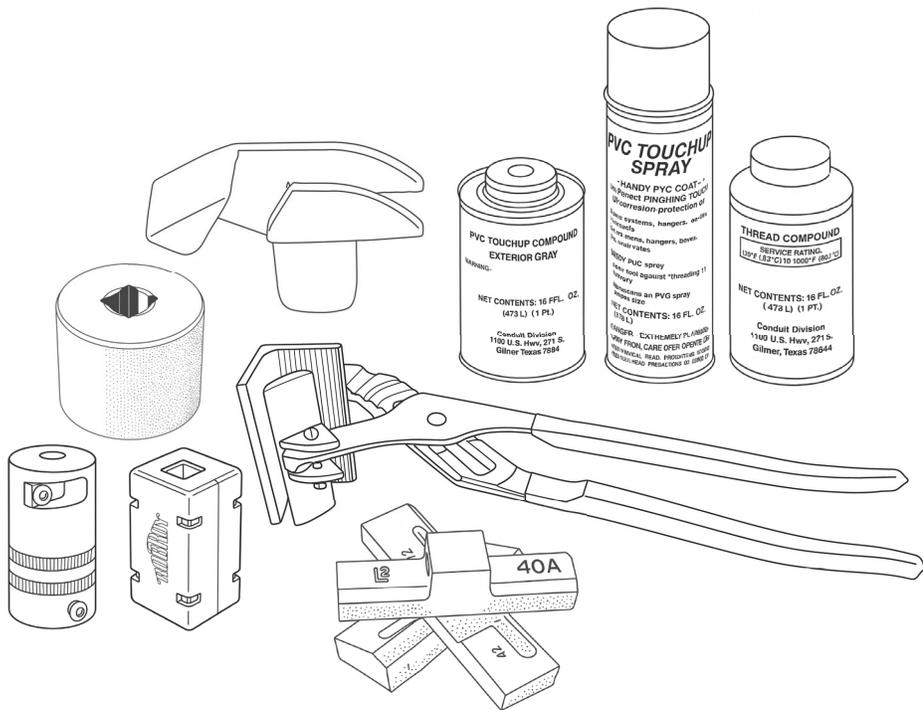

Did You Know?

Stahlin enclosures have been on the big screen! In 1985, one of Stahlin's very own enclosures was used in the movie *Back to the Future*, playing the role of the Flux Capacitor. This handy box was what gave the DeLorean the ability to time travel!

Join Sir Robby's Trusted Protectors

Every great knight needs skilled allies! Robby trains brave helpers to use the best tools and procedures to protect the kingdom. Draw your portrait on this Certified Knight card to join Sir Robby's Order of Protectors!

Did You Know?
 Robby's **Certified Installer Training** equips contractors with the right tools and knowledge for fast, reliable installations.

ACROSS

4. What installers earn after completing Robroy's official training course.
5. Fitting used to connect two pieces of conduit together.
8. Hygienic environments, like food processing, require this type of support system.
9. Another word for a pathway that safely carries electrical conduit or wiring.
11. Material type used in Stahlin and AttaBox enclosures.
12. Third party verification for superior coating adhesion.

DOWN

1. Rocket Rack's online tool that speeds up designing and ordering of support systems.
2. The main job of both enclosures and raceway products.
3. Strong, UV-resistant material used in AttaBox enclosures.
6. The ability to withstand wear, pressure, or damage.
7. Organization that sets enclosure standards like 4X and 6P.
10. The dragon that Sir Robby fights!

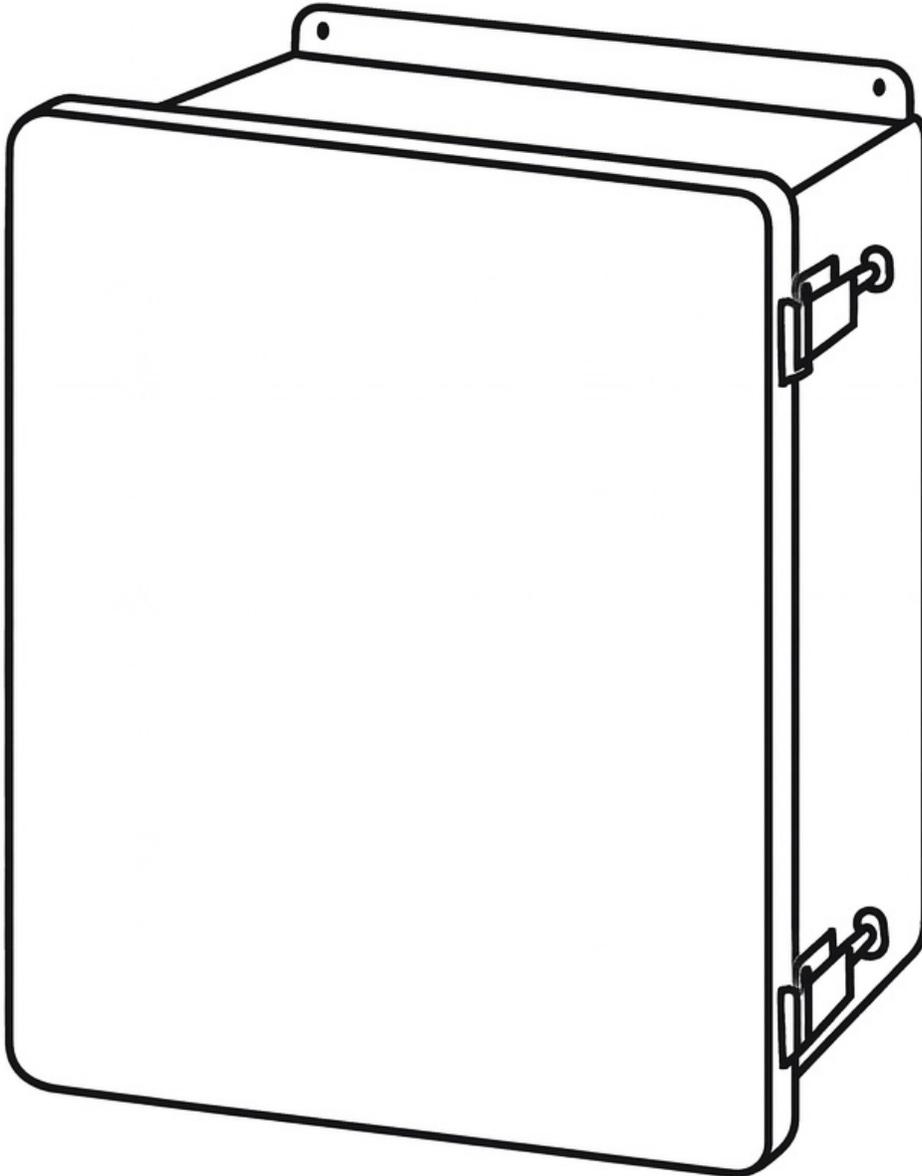

Designing Strong Systems for a Stronger Kingdom

In the castle's strategy hall, contractors use the **Rocket Rack Configurator** to design the strongest support systems in the kingdom!

Design an Enclosure That's Fit for a Knight

Sir Robby needs an enclosure that's strong and reliable to guard his most valuable treasures. Can you design one that's fit for a knight? Add locks, patterns, or windows, but most importantly, make it yours!

Did You Know?

Both Stahlin and AttaBox offer a special program called **ModRight**. The ModRight program gives engineers the power to completely customize enclosures to match any project requirement.

On the kingdom's job sites...

protection is everything. This contractor installs Plasti-Bond PVC-Coated conduit to shield electrical systems from corrosion, even in the toughest environments. Plasti-Bond is also built for direct burial and comes with factory elbows and smart innovations that make installation faster and easier.

You've Completed the Quest!

Well done, brave knight! You've journeyed through every challenge and finished Sir Robby's Quest. Here are the answers to the puzzles — the secret keys to the kingdom's riddles!
